

Exercise 1

A Bit About Myself

Good Day!

I am Mark Kevien Cielo, 25 years old, from Santa Rosa City, Laguna. I used to study Computer Science but wasn't able to finish my degree due to certain problems and the addition of the pandemic. My hobbies are hiking, cycling, basketball, and playing video games. I am currently working in the food and beverage industry.

I enrolled in this bootcamp because I saw it as an opportunity to continue what I started in college and go back to what I really enjoy doing and make a career out of it.

My motivation for finishing this bootcamp is for the betterment of myself. I want to improve and be able to achieve greater things in life. And lastly, for my loved ones.

As for achievements and memorable events, I don't really have any of those that I can quite consider yet, but I'm planning to make this bootcamp the start of those things.
